Zwipe Access – 125kHz Format Guide

Supported Physical Access Control System (PACS) Formats

Zwipe Access 125kHz based contactless biometric credentials can be ordered already encoded with a variety of Wiegand data format commonly used in the physical access control industry. Proximity credentials are designed to be compatible with a large set of PACS systems on the market, including HID Prox, Casi-Rusco, and AWID. All custom encoded Zwipe Access credentials come standard with the serial number or facility codes printed directly on credential.
