

Why Choose CPI?

Protecting your technology investment.

At Chatsworth Products (CPI), it is our mission to address today's critical IT infrastructure needs with products and services that protect your ever-growing investment in Information and Communication Technology (ICT). We act as your business partner and are uniquely prepared to respond to your specific requirements with global availability and rapid product customization that will give you a competitive advantage.

Customization and Customer Focus

CPI understands every company has a unique approach to network design, that's why our team of engineers develop innovative solutions to support the ever-growing Internet of Things (IoT). Unlike companies that create mass produced, "cookie-cutter" solutions, CPI's engineering and manufacturing model enables flexibility to create and alter products to solve problems. CPI's team of specialists can help you address and design a solution to solve issues with equipment installation, airflow, architectural obstacles, power, cooling limitations and more.

Products and Solutions

CPI delivers innovation, configurability, quality and value with a breadth of integrated system components covering virtually all physical layer needs of today's IT infrastructure, structured cabling, enterprise network, data center, physical security, energy management, building automation, environmental monitoring, industrial automation, edge computing and IoT. Our product offering includes:

- Cabinet, Enclosure & Containment Systems
- Environmental Enclosure Systems
- Cable Management
- Cable Runway & Tray
- Environmental Monitoring & Security
- Grounding & Bonding
- KVM Systems
- Power Management
- Rack Systems
- Seismic Protection Systems
- Wall-Mount Systems
- Zone & Wireless Enclosures

PRODUCTS

Global Manufacturing and Availability

Today's IT infrastructure needs aren't limited by borders. Headquartered in the United States, CPI operates from multiple sites worldwide, including offices in Mexico, Canada, China, United Arab Emirates and the United Kingdom. CPI's manufacturing locations are in the United States, Europe and Asia. This allows for faster delivery and a more cost-effective solution to meet busy scheduling requirements. Additionally, CPI's products are readily available through a global network of industry-leading distributors. With a high level of stock availability, along with CPI's consistently short factory lead times, you can be assured that CPI solutions will be accessible to meet your project scheduling needs.

Quality

Our products deliver reliable, structural support that exceeds customer expectations through innovation, functionality and performance. Rely on CPI solutions for the best protection against hazards associated with unauthorized access, overheating and cable bend radii and congestion. Contractors and installers know they can depend on CPI products to arrive in good condition and ready to assemble. CPI's facilities meet the strict requirements to be an ISO 9001 Certified Company.

• Unsurpassed Strength

CPI will exceed your expectations, offering the best value and lasting support for multiple generations of your technology. Products are manufactured from high-quality materials and subjected to stringent testing, resulting in unsurpassed strength and less deflection than competitors' offerings under loaded conditions.

• Heavy-Duty Packaging

CPI has developed unique packaging designed to protect each individual product during shipping. With robust construction that has been rigorously drop-tested to ensure impact resistance and prevent damage, CPI's heavy-duty packaging ensures that your products will arrive in perfect condition.

• Quick Installation

We work hard to save you time. Many of our products can be assembled or mounted by one person, using minimal tools. CPI was one of the first companies to offer rack-mount space (U) markings to simplify installation of components. All of our two- and four-post racks feature integrated grounding to make installation quick and easy. Additionally, many of our products and accessories are designed with CPI's Click Secure Technology, which features tool-less installation and assures users that the product is securely locked into place.

• Durability

CPI products provide years of reliable service, supporting multiple equipment refresh cycles. A wide range of accessories and the ability to quickly customize solutions allows rack structures to be adapted to changes in equipment to accommodate new applications, airflow patterns, power distribution and network cabling.

Industry Leadership

Leading the industry in innovation and excellence, CPI has numerous active patents for groundbreaking product designs, along with multiple awards from prominent national organizations. CPI has received more than 150 patents for its product designs. Some key product milestones include:

- 1997** Introduced the award-winning M-Series MegaFrame® Cabinet, which provided more cable management space than any other cabinet on the market, as well as the CatRack™, a total solution for Cat 5 support
- 1999** Introduced the industry's first colocation cabinet, the E-Series ISP Co-Location Cabinet
- 2002** Introduced the industry's first cable management solution at the rack-mount unit level
- 2006** Introduced F-Series TeraFrame® Cabinet, which provided extensive customization with a short lead time
- 2006** Introduced CPI Passive Cooling® Solutions, which revolutionized data center cooling by providing an efficient, flexible and cost-effective way to manage hot exhaust air created by IT equipment
- 2012** Introduced eConnect® Power Distribution Units (PDUs), the new generation of intelligent power distribution
- 2014** Introduced Z4-Series SeismicFrame® Cabinet with an industry-leading 1500 lb (680 kg) seismic load rating
- 2015** Awarded another patent for the Vertical Exhaust Duct, a key component of CPI's data center equipment cabinet lines

Service and Support

CPI recognizes that the high-speed world of data management is constantly changing and for this reason, we offer highly trained specialists to help solve your IT infrastructure needs.

- Sales Managers and Representatives have been trained to assist you in selecting the right CPI products to meet your needs—for now and for the future. Visit our website at www.chatsworth.com/contact-us/find-cpi-rep/ to find a salesperson near you.
- Field Application Engineers will meet with you on-site to evaluate requirements, and discuss product and solution options.
- Technical Support Specialists can help design a precise layout for your data center including appropriately sized racks, cabinets and cable managers based on your specific requirements. Our specialists will also plan your cable runway or cable tray, and provide a detailed bill of material (BOM) along with layout and assembly drawings of cable pathways and cabinet configurations.
- Applications Engineers assist with creating custom designs for new applications, as well as kitting and product modifications to meet specific applications.
- Customer Service Representatives offer valuable assistance in locating and working closely with distributors to maintain product availability, ultimately helping preserve your project's scheduling requirements.

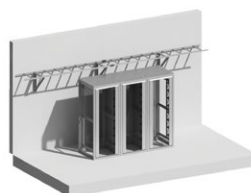

Resources and Online Tools

CPI offers several resources and tools to help you easily and efficiently plan and design projects to meet your deadlines and requirements.

CPI Online Catalog

Search, filter and compare more than 92,000 standard products.

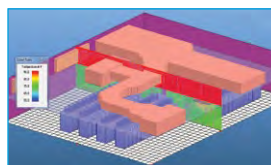

Design Tools

Download CAD Blocks, Visio Shapes and BIM Models free of charge on CPI's website.

Product Configurator

Create custom cabinets, racks, wall-mount products and power management solutions.

Computational Fluid Dynamics (CFD) Analysis

Using state-of-the-art 3D software, CPI provides simulation and analysis of data to help you plan your design.

CPI Mobile Apps

The CPI Mobile App Suite includes a cable fill calculator, cabinet selector, eConnect PDU selector, wall-mount cabinet selector and a BOM tool. The CPI Mini Catalog App allows you to easily view, search and download product documentation, while on the go.

Field Expert Site Visits

CPI's field experts will meet with you on-site to evaluate requirements and discuss product and solution options.

Who is CPI?

A company that lives by the motto, "We're all in this together."

CPI is a 100 percent employee-owned company that was founded in June 1991, when 90 workers joined together and purchased the Dracon Division of Harris Corporation using an Employee Stock Ownership Plan (ESOP). Recognizing the deregulation in the telecommunications industry and technological innovation in voice and data equipment, CPI decided to focus on the explosive needs of the information technology market to manage IT infrastructure equipment.

With the financial strength to reinvest in the company and continually improve manufacturing and logistical processes, CPI has become an industry leader, providing product innovation and excellence. Central to the success of CPI has been the establishment of employee empowerment under a philosophy of quality through teamwork, caring and commitment. This philosophy has led to continuous improvement, which is extended to customers through our solutions and services.

Proven Expertise

From the Regents Emirates Pearl Hotel in Abu Dhabi, to Telefônica Vivo, the largest integrated telecom in South America, to Oregon's greenest multitenant data center, CPI has provided complete solutions that not only protect technology investments, but help companies achieve industry recognitions, and meet today's standards for green IT. Contact CPI for a solution that meets your exact needs, and visit the website to find out more about the companies we have already helped.

Visit Us

See our products firsthand by visiting one of our many product showrooms across the globe or the Research, Development and Training (RD&T) Center in Georgetown, Texas. The RD&T Center offers visitors the opportunity to observe real-world data center thermal testing and allows CPI to perform top-notch in-house product testing. Not only does this 10,200 square-foot center boast state-of-the-art test facilities, it also provides a fully equipped training center, product showroom and modern customer meeting center.
